

Restore™ and Restore Plus™ Heavy Duty Cleaners

Restore™

- Alkaline-Based Cleaner
- Most Effective Cooling System Oil/Fuel Contamination-Cleaning Agent on Market
- 10 Times More Effective than Automotive Distributor Detergent Powders
- Safe for Use in Aluminum Radiators and Heaters
- Removes Silicate Gel

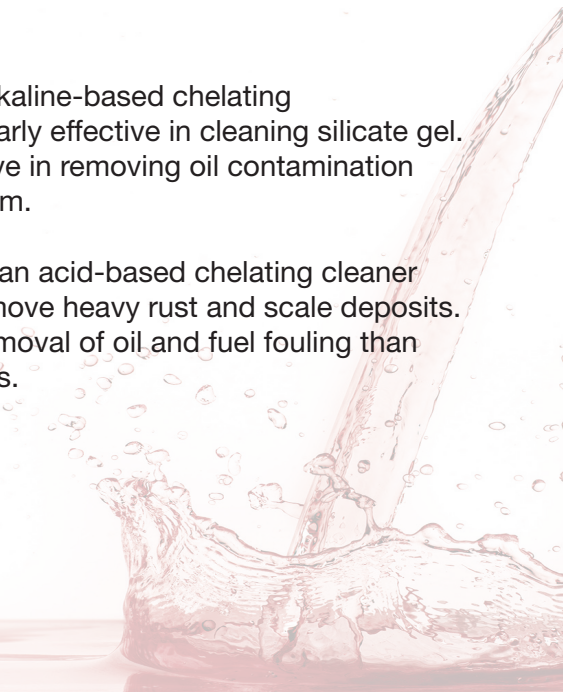

Restore Plus™

- Mild Acid-Based Chelating Cleaner
- Safely Removes Rust, Corrosion, Scale, and Solder Bloom without disassembling your Cooling System

Once a coolant system is fouled and plugged you will not succeed in removing the “dirt” by flushing with plain water. Fleetguard’s system cleaners Restore and Restore Plus address the variety of cleaning needs. They remove contamination without harming the metal surfaces, gaskets, hoses or plastic parts of a heavy-duty cooling system. Both cleaners work quickly and effectively to solve cooling system problems, saving cost-intensive downtime.

Restore is an alkaline-based chelating cleaner particularly effective in cleaning silicate gel. It is also effective in removing oil contamination and solder bloom.

Restore Plus is an acid-based chelating cleaner designed to remove heavy rust and scale deposits. It is better at removal of oil and fuel fouling than alkaline cleaners.

Ordering information

| Part-No. | Description | Units |
|----------|--------------|-----------|
| CC 2601 | Restore | 3,8 litre |
| CC 2611 | Restore | 19 litre |
| CC 2612 | Restore | 208 litre |
| CC 2638 | Restore Plus | 3,8 litre |
| CC 2637 | Restore Plus | 208 litre |

How to use Restore and Restore Plus

- 1** Drain the cooling system and dispose of used coolant. Backflush the system.
- 2** Immediately add 1 litre of Restore or Restore Plus for each 10-15 litre of cooling system capacity and fill the system with plain water.
- 3** Turn heater temperature switch to high to allow maximum coolant flow through heater core. Blower does not need to be turned on.
- 4** Run the engine at normal operating temperature for 2 hours.
- 5** Drain and flush the system with plain water and change your water filter if applied.
- 6** Refill with a fully formulated Coolant (such as Fleetguard ES Compleat or Fleetcool OAT)

Important:

Fleetguard's Restore and Restore Plus contain NO antifreeze. Do not allow cooling system to freeze during cleaning operation!

Note:

The performance of Restore and Restore Plus is dependent on time, temperature and concentration levels. An extremely scaled or flow restricted system, for example, may require higher concentrations of cleaners, higher temperatures, or longer cleaning time. Restore and Restore Plus can be used safely up to twice the recommended concentration levels. Extremely scaled or fouled systems may require more than one cleaning. Maximum recommended engine running time with any type of cleaner in the cooling system is 3 hours. Any prolonged usage may cause damage to system elastomers and corrode system soft metals.
